www.kontron.com**VX3230 - NEW!**

3U VPX PowerPC SBC

The VX3230 is the first member of Kontron's new VITA 46 VPX range of products. Its 1 GHz MPC8544 PowerPC processor gives you the coolest implementation of an E500 core with plenty of features. With a requirement as low as 10 Watts between -40° and + 85°C, the VX3230 is a major breakthrough for small form factor rugged computers. Applications targeting Vetronics and onboard UAV that operate on a tight power budget will welcome its innovative design.

**kontron****FEATURES**

- › VX3230 SBC implements VITA 46.0, 46.4, 46.7, 46.9
